This is UNEVALUATED Information

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE  
OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50  
U.S.C. 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION  
OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PRO-  
HIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

1. In July 1955, the Bruenlasberg Ore-Crushing Plant was in full operation. Soviet soldiers who wore red-bordered black epaulets worked at the plant. The early shift was worked from 0800 to 1400, the afternoon shift from 1400 and 2000. About 80 Soviet soldiers from Schneeberg were attached to each shift.

2. The coarse ore was trucked to the ore-crushing plant in sheet metal-lined boxes. After the ore had been crushed, it was packed into impregnated cardboard containers and was trucked to the Aue railroad station where it was transloaded into boxcars. Within a two-hour period, six trucks, each loaded with 50 to 90 containers, left the installation and went toward the railroad station. Within the same period, 25 to 30 trucks were seen entering or leaving the ore crushing plant. During a two-hour period, three trucks loaded with three mine carloads of low-quality ore arrived from Mine No 99.
